

STEP 1

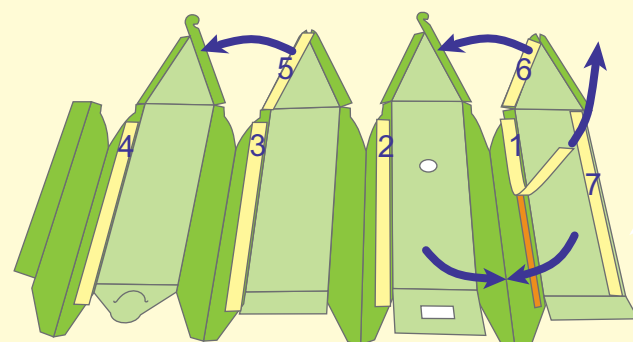

Assembling the rocket

Unfold the rocket and lay down flat as shown above.

Cut strokes of the double sided tape and stick these on the rocket as shown above. Attention: the tape for the left strip must be placed on the right (7).

Remove the tape's protection strip (1) and fold the rocket to a close, press firmly. Repeat for tape strip 2 until 6.

Remove the protection strip from tape 7 and firmly press in onto the closing flap. Link the closure at the top of the rocket.

STEP 2

Seed-bed
(sow the seeds when André tells you to do so in April 2004)

Take a sheet of paper kitchen towel

Fold the sheet twice as shown above

Cut a sheet measuring 9,5 x 5,5 cm

Moist the sheet and press out the air

Sow the seeds on the seed bed

STEP 3

The plant growth chambers

1. Opaque chamber

2. Chamber with light window

Place the seed-bed on the die-cut of the chamber. Press out the air underneath the seed-bed. Attention: watch the orientation!!

Fold the chambers to a close

Close the chambers using the dagger locks

Close the side flaps of the chambers

Click the chambers together

STEP 4

Placing the growing chambers inside the rocket

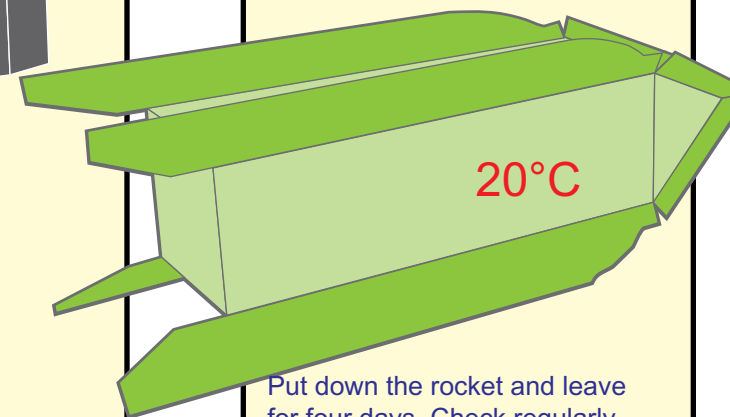

Slide the chambers into the rocket
Attention: Make sure that the light windows (in the chamber and the rocket) are in line

Close the rocket at the back as shown (first hook the bottom flaps in the square slot)

Continue by hooking the top flap in the square slot

Put down the rocket and leave for four days. Check regularly if the paper is still moist enough. After four days you can place the rocket upright
