

Contents

Chapter 1	Introduction	1
	1.1 A Fluid	1
	1.2 The Critical Point	2
	1.3 History	3
	1.4 Motivation.....	5
	1.5 Outline of the Thesis	5
Chapter 2	Heat transfer in critical fluids	7
	2.1 The critical state.....	7
	2.1.1 <i>Thermodynamic relations</i>	7
	2.1.2 <i>Power laws</i>	8
	2.1.3 <i>Transport properties</i>	10
	2.2 Heating a critical fluid	11
	2.2.1 <i>Heat transfer equation and the Piston Effect</i>	11
	2.2.2 <i>Isentropic temperature rise</i>	13
	2.2.3 <i>Boundary layers and the Piston Effect</i>	16
	2.2.4 <i>Density changes</i>	18
	2.3 Bulk temperature induced boundary layers.....	18
	2.3.1 <i>Temperature lag</i>	19
	2.3.2 <i>Excess density</i>	21
	2.4 Gravity effects.....	23
	2.4.1 <i>Density stratification</i>	23
	2.4.2 <i>Heating a critical fluid</i>	24
	2.4.3 <i>The two-phase region</i>	25

Chapter 3	Experimental Equipment	27
	3.1 The Critical Point Facility	27
	3.1.1 <i>Outline of the CPF.</i>	27
	3.1.2 <i>The Thermostat Unit.</i>	28
	3.1.3 <i>A Sample Cell Unit</i>	29
	3.1.4 <i>The optical diagnostics.</i>	29
	3.1.5 <i>The Thermal Control System.</i>	32
	3.1.6 <i>The Experiment Dedicated Equipment.</i>	33
	3.1.7 <i>The Data Handling System</i>	33
	3.1.8 <i>The automatic timeline program</i>	34
	3.2 The Laboratory Equipment	34
	3.3 The Sample Cell Units.	36
	3.3.1 <i>The interferometer unit.</i>	36
	3.3.2 <i>The Spaceflight Sample Cell Unit.</i>	37
	3.3.3 <i>The Sample Cell Unit for refractive index measurements.</i>	40
Chapter 4	Interferometry	43
	4.1 Interferograms.	43
	4.1.1 <i>Interference order</i>	43
	4.1.2 <i>Interferogram analysis</i>	44
	4.2 Inhomogeneous density fields	45
	4.2.1 <i>Deviation of Light Rays.</i>	45
	4.2.2 <i>The parabolic approximation</i>	46
	4.2.3 <i>Influence of the cold walls.</i>	48
	4.3 Shadow evaluation.	48
	4.3.1 <i>The appearance of a shadow</i>	49
	4.3.2 <i>An alternative procedure.</i>	51
Chapter 5	Density and refractive index	55
	5.1 Linearity of $n(\rho)$ dependence.	55
	5.2 Experimental procedure.	57
	5.3 Meniscus position analysis	58
	5.4 Results and discussion	60
Chapter 6	Heat transfer - Experimental results	65
	6.1 General results	65
	6.1.1 <i>Experimental scenario</i>	65
	6.1.2 <i>The critical temperature</i>	66
	6.1.3 <i>Heat flows.</i>	67
	6.2 Data analysis	69
	6.2.1 <i>Temperature and density</i>	69

	6.2.2 Heating pulses	69
	6.2.3 Apparent wall properties	71
	6.3 Piston Effect	71
	6.3.1 Results and discussion	72
	6.3.2 Conclusions	77
	6.4 Thermal diffusivity	78
	6.4.1 Methods for the determination of the thermal diffusivity	78
	6.4.2 Results and discussion	80
	6.4.3 Conclusions	83
	6.5 Isochoric Specific Heat	84
	6.5.1 Method of analysis	84
	6.5.2 Results and discussion	86
	6.5.3 Conclusions	91
Appendix A	Temperature profile in boundary layers	93
Appendix B	The PE near the heater	97
Appendix C	Time independent integral	101
Appendix D	Thermistor response	103
Appendix E	Optical matters	105
	E.1 The parabolic approximation	105
	<i>E.1.1 Conditions for the parabolic approximation</i>	105
	<i>E.1.2 The accuracy of the parabolic approximation</i>	108
	E.2 CPF Optical details	111
Appendix F	Lists	113
	F.1 Nomenclature	113
	<i>F.1.1 Symbols</i>	113
	<i>F.1.2 Greek symbols</i>	115
	<i>F.1.3 Indices</i>	115
	F.2 List of acronyms	116
	F.3 List of tables	117
	F.4 List of figures	117
